**Your application from 15/03/2021 for ethical review of the project
„COVID-19 Vaccination Readiness Assessment of medical students
(COVRAM)“**

Dear Prof. Dr. Betsch,
Dear Dorothee Heinemeier,

I would like to inform you about the decision made by the advisory board on ethical issues of the University of Erfurt, which reviewed your application in a circulation procedure:

With regard to the ethical aspects, we confirm that the project „COVID-19 Vaccination Readiness Assessment of medical students (COVRAM)“ has followed the ethical guidelines of the University of Erfurt.

The safety and well-being of the subjects is ensured at any time. There are also no ethical concerns for the recruitment of the participants, the implementation of the study design or the subsequent data analysis and processing.

The undertaken measures safeguard the ethical standards as proposed by the DGPs (German Psychological Society). There are therefore no objections to the research project from an ethical point of view.

We would like to underline the fact that a strict legal review of the research project has not been made.

We wish you success for the further implementation of your research project!

Sincerely yours,

Prof. Dr. Benedikt Kranemann
